We respectfully acknowledge the Lekwungen-speaking peoples (Songhees and Esquimalt Nations) and other Coast Salish Nations on whose traditional lands we have developed this forecast and report.

# Minister's Message

The B.C. Labour Market Outlook: 2021 Edition is a look ahead. It offers British Columbians – and others across Canada and around the world – a picture of our employment future. It presents insights into the supply and demand for labour: both for those seeking work and those offering employment.

COVID-19, climate change, and the inequities and barriers too many people face in British Columbia are all shaping the future of our province. To meet these challenges and opportunities, we must support meaningful reconciliation with Indigenous Peoples and build an innovative, sustainable and inclusive economy.

Rapid change will mean increasing demand for skilled workers in emerging and expanding sectors. British Columbians want to make sure our province is ready to meet those future demands. We are planning and looking ahead to ensure that the next decade is filled with opportunity and prosperity for all British Columbians.

This report will be a key resource for people across our economy:

- For young people and those in the workforce, it identifies the best opportunities in each region of the province and how to prepare for them.
- For investors and employers, it provides guidance on our province's people and skills.
- For education and training planners, it shows what demand to expect for their services.

We want everyone in British Columbia to benefit from the job openings and strong labour demand that this report forecasts. The diversity of our workforce will be its strength. With the right supports and training opportunities, Indigenous people, women, people of colour, people with disabilities and other underrepresented people in the labour market have opportunities to benefit.

This report shows that, in the next 10 years, nearly 80 per cent of job openings will require post-secondary credentials. As Minister of Advanced Education and Skills Training, I am committed to ensuring that every British Columbian is able to get the education and training they need to thrive into the next decade. This education and training will be the foundation of a strong future and will help people get good family-supporting jobs to build their lives and the lives of their families, loved ones and communities.

As we work to support people to seize those opportunities, we will build a stronger B.C. together.

Anne Kang  
Minister of Advanced Education and Skills Training

## Other Acknowledgements

We are grateful for the valuable information and feedback provided by representatives of Indigenous communities, industry associations, employer associations, unions, training organizations, federal and local governments, labour market consultants, business groups, education institutions, and associations and colleagues across the provincial government.

# About this Report

## What is the Labour Market Outlook?

The B.C. Labour Market Outlook is a 10-year forecast of the supply and demand for labour in British Columbia. The purpose of this report is to provide British Columbians with the knowledge they need to make informed decisions on careers, hiring, training and education. The report estimates future supply and demand by industry, occupation, education and geographic region. It also covers potential demand for the skills and competencies that job seekers will need to succeed in the next 10 years.

The report is typically revised every year with the most up-to-date information available. However, in 2020, the COVID-19 pandemic created a high degree of uncertainty about the future, and as a result no report was released. The 2021 report covers the period from 2021 through 2031. This report provides the best available information about the kinds of jobs and skills that will be most in-demand regionally and province-wide over the coming decade.

## Who is the Labour Market Outlook for?

The report helps young people plan their careers. It also helps mid-career and more mature workers looking to shift jobs or change careers. The report is a useful resource for educators as they develop courses; it helps learners identify and prepare for jobs; and it supports employers and government as they develop training strategies and investment plans.

Students, families, school counsellors and people looking for work use the projections in this report to make informed decisions about jobs in the future, and the education and training they will need along their career paths. Employers and investors use the information for long-term planning, and industry leaders apply it when identifying skill needs. Employment projections can help government make decisions and policies to build the best B.C.

The report also has a role to play in making the B.C. labour market more inclusive by ensuring that Indigenous communities have access to information about labour

demand, both across the province and within the regions where they live. It is also a tool that can help people who are under-represented in the labour market, such as people of colour, immigrants, women and people living with disabilities, to learn about all of the opportunities available to them.

The detailed data behind this report are posted on the [B.C. Data Catalogue](#). Professionals ranging from entrepreneurs to public and private sector planners can use the data for analysis and planning in their specific fields.

## Where do the numbers come from?

The report uses the most reliable, relevant and up-to-date data from sources including BC Stats, B.C. Ministry of Finance and other provincial ministries, Statistics Canada and federal departments. Analysts use a sophisticated economic modelling system to study the data and other factors affecting labour market supply and demand. (A full [technical description](#) of the model is posted on the website of the Labour Market Information Council.) Analysts also look at factors including geographic region, industry, occupation, skills and competencies. The model projects economic growth, productivity trends and the need to replace retiring workers. It includes factors related to population growth, the number of people seeking work and typical education requirements.

Analysts then test the projections with employers, unions, industry groups and post-secondary institutions. They hold individual meetings with partners, other governments and stakeholders, take part in large group meetings, present their forecasts at conferences, and work with sector or occupation-specific task forces or committees. In addition, the Ministry of Advanced Education and Skills Training sponsors [Sector Labour Market Partnership](#) projects that provide valuable input and opportunities to evaluate Labour Market Outlook forecasts. Researchers review and update data and assumptions each year to reflect technical innovations and other factors affecting labour supply and demand.

The projections in the report are evidence-based and thoroughly tested. They give a wide range of individuals, businesses, governments and Indigenous communities a high degree of confidence that they can make sound decisions about the labour force.

## What are the major changes in this edition?

This year's forecast looks at the impact of the COVID-19 pandemic. It includes the recovery we have seen so far in 2021, with a forecast of how affected industries will continue to recover and how other industries will continue to grow.

The key changes this year are:

- A new [Career Search Tool](#) on WorkBC.ca that lets users search careers of interest using eight possible filter categories: Region, Education, Occupational interest, Industry, Occupational category, Part-time/ Full-time, Salary, and keywords and/or job titles.
- A new [Career Transition Tool](#) on WorkBC.ca that uses information about education, skills and experience to identify occupations that users could move to relatively easily from their existing occupation.
- An online dashboard application giving access to interactive versions of the charts and tables in this report.
- A new apprenticeship certificate education category. The previous education category called Diploma and certificate has been split into two subcategories: Apprenticeship certificate and Other diploma and certificate. This gives more focus on the unique apprenticeship education system with its mix of in-class learning (typically around 20 per cent of learning time) and learning on the job (typically 80 per cent of learning time).
- Redefining certain industries and expanding the industries covered from 59 to 61.
  - Support activities for forestry and agriculture industry was discontinued and the forestry portion combined with Forestry and logging to make a new industry called Forestry, logging and support activities. Similarly, the previous Support activities for agriculture industry was combined with Farms to make a newly defined industry called Farms and support activities.
  - Support activities for transportation industry was discontinued and reallocated to individual transportation modes (for example, Air transportation was redefined as Air transportation and support activities).
- Adjustments to the model to improve the accuracy of the employment estimates for selected occupations based on a comparison of Labour Market Outlook: 2019 Edition estimates and Statistics Canada's Labour Force Survey employment data.

## 1.0 | 10-year overview

From 2021 to 2031, B.C. Labour Market Outlook analysts project **1,004,000 job openings** in British Columbia.

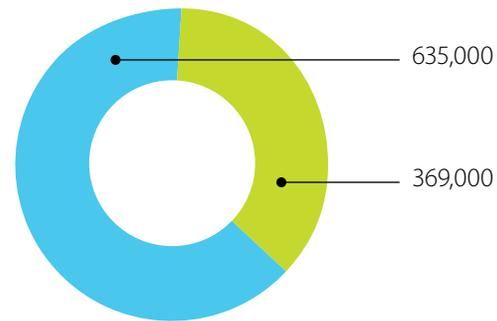

The population and the labour force will continue to age, and employers will need to replace retiring workers. Approximately **635,000 job openings are for replacement**. This represents about 63 per cent of job openings that will need to be filled to replace workers permanently leaving the labour force.

The other **369,000 job openings are expansion**. This means 37 per cent of the 10-year total job openings will be new jobs created through either recovery from COVID-19 or new economic growth. Employment will total 3 million by 2031, up from 2.6 million today. Employment will grow by 1.5 per cent a year during the first five years of the forecast and by 1.1 per cent during the last five years. Industries bouncing back from COVID-19 will drive growth in the first few years of the forecast. The technology and health care sectors will be the key growth industries over the next 10 years.

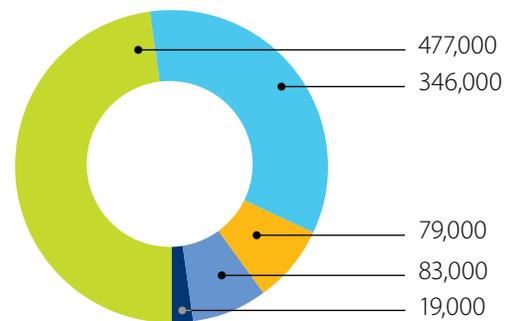

About 2 per cent of this employment growth will come from a decline in the number of unemployed as the economy recovers from COVID-19. These future job openings will also be filled through a variety of labour supply additions. Young people (aged 29 or younger) entering the labour force for the first time are expected to fill 48 per cent of future job openings. New immigrants will fill 35 per cent of the openings. Workers coming from other parts of Canada will fill 8 per cent of the jobs. Finally, as the recovery from COVID-19 continues, some of the job openings will be filled by reduced unemployment as unemployed workers find jobs.

After accounting for reduced unemployment, young people, new immigrants and in-migrants from other provinces and territories joining the workforce, there are 83,000 job openings that need to be filled over

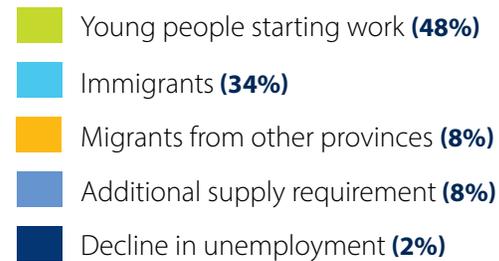

**FIGURE 1-1: LABOUR MARKET OUTLOOK HIGHLIGHTS, B.C., 2021-2031**

**TOTAL JOB OPENINGS: 1,004,000**

**SUPPLY ADDITIONS AND REDUCED UNEMPLOYMENT: 1,004,000**

**Note:** Values are rounded; percentages are shares of the total job openings and may not add up to 100% due to rounding.

the next 10 years. This indicates a relatively tight labour market and a supply gap. It increases the likelihood that employers will face labour shortages for certain occupations.

However, B.C.'s labour market is efficient and flexible. Additional supply will come from more people joining or returning to the labour force. Education and skills training will add to labour force participation. Removing the employment barriers that some British Columbians experience will also help. In addition, more rapid automation may help close the gap by reducing the number of job openings.

## 1.1 | Changes from the 2019 forecast

The 2021 forecast projects 143,000 more job openings over the 2021-2031 period than the 2019-2029 period. This difference includes 106,000 more expansion job openings and 37,000 more replacement job openings.

The higher expansion job openings result mainly from increased population growth due to higher federal immigration targets; a higher forecast in the demand for technology occupations; and continued recovery in industries negatively impacted by COVID-19. About one-third of the growth in expansion job openings is due to bounce-back from COVID-19.

The increase in replacement job openings is the result of the continued aging of the population as well as a larger labour force than in the previous forecast.

The forecast also factors in some expected long-term impacts from COVID-19 that will reduce labour demand and increase productivity. In response to the pandemic, many customer-facing industries offered new services and adopted different business processes. Some of these changes will continue in the long term and result in higher productivity and lower labour demand than the pre-pandemic 2019 forecast assumed. For example, analysts expect lower rates of business travel as new video and digital technologies replace the need for some to travel. Analysts also expect greater productivity growth in the restaurant industry due to a continuation of pandemic-related processes, but also in response to challenges in recruiting workers.

The most significant change to the supply forecast is an increase in federal immigration targets and recent trends in temporary foreign workers. The 2019 forecast assumed 263,000 new workers from immigration over the 2019-2029 period.<sup>1</sup> The 2021 forecast expects about

**346,000 new immigrant workers** over the 2021-2031 period. This includes both permanent and temporary immigrants. As a result, immigrants' share of job openings will increase from 31 per cent to 34 per cent. Immigration drives higher labour demand as well as labour supply.

Immigrants are a vital part of communities across the province. They bring fresh perspectives and new ideas, and contribute to making our communities vibrant, diverse and prosperous. New immigrants also bring valuable skills, fill important jobs in our economy and start businesses. In addition to increasing the labour supply, they also increase labour demand as they get settled and consume goods and services supplied by others.<sup>2</sup>

The combination of 143,000 more job openings and only 109,000 more workers means the additional supply requirement over the next 10 years has increased to 83,000 from 49,000 in the 2019 forecast.

This **additional supply requirement of 83,000 workers** can be considered a shortage in that, if these jobs are not filled or replaced through automation, B.C.'s economic growth will be impacted.<sup>3</sup> However, it is expected that this gap will be filled from a combination of increased labour force participation and automation. For example, continued education and skills training resources and social assistance supports will allow people who want to work to overcome education or other barriers that are keeping them from pursuing employment. Changes in how employers recruit workers will also play a role in drawing more people into the labour market to address shortages. Finally, there are 175,000 job openings that have a high chance of being automated and help reduce the impact of the labour shortage (see discussion box, Effects of Automation, page 8).

1. The Federal Immigration Levels Plan announced in 2020 aims to attract to Canada 401,000 new permanent residents in 2021, 411,000 in 2022 and 421,000 in 2023, representing an increase of about 50,000 permanent residents each year. About 15 per cent of these targets would be admitted to the province based on B.C.'s national share of immigrants. The Labour Market Outlook uses the latest forecast from BC Stats for total permanent and temporary immigrants to B.C. over the next ten years. Labour force participation rates from the 2016 Census for recent immigrants are used to project how many of them will join the labour force.

2. The relationships in the Labour Market Outlook forecasting model illustrate this dynamic. For example, if 10 new immigrants join the population, the model generates a need for four additional job openings to support their consumption and investment. On the supply side, about six of the 10 immigrants would join the labour force. This means that 10 new immigrants add a net total of two people to the overall supply (six joining the labour force less four positions to meet increased demand).

3. According to the B.C. Labour Outlook model, if these 83,000 jobs are not filled or automated, B.C.'s GDP by 2031 would be 2.6 per cent lower than if they had been filled.

## Effects of automation

The forecast incorporates the continuation of historical productivity growth and automation trends. It also incorporates the expected increase in productivity due to COVID-19 in industries such as tourism and hospitality and retail, as well as other industry-specific trends.

However, there could be more rapid adoption of automation technologies than this forecast assumes. Nearly 175,000 job openings over the next 10 years will be in occupations with a high chance of being affected by automation. The top 10 occupations that have potential for more rapid automation are:

- **Retail salespersons**
- **Administrative officers**
- **Food counter attendants, kitchen helpers and related support occupations**
- **General office support workers**
- **Drivers**
- **Cooks**
- **Sales and account representatives**
- **Financial auditors and accountants**
- **Cashiers**
- **Administrative assistants**

## 2.0 | Year-over-year outlook

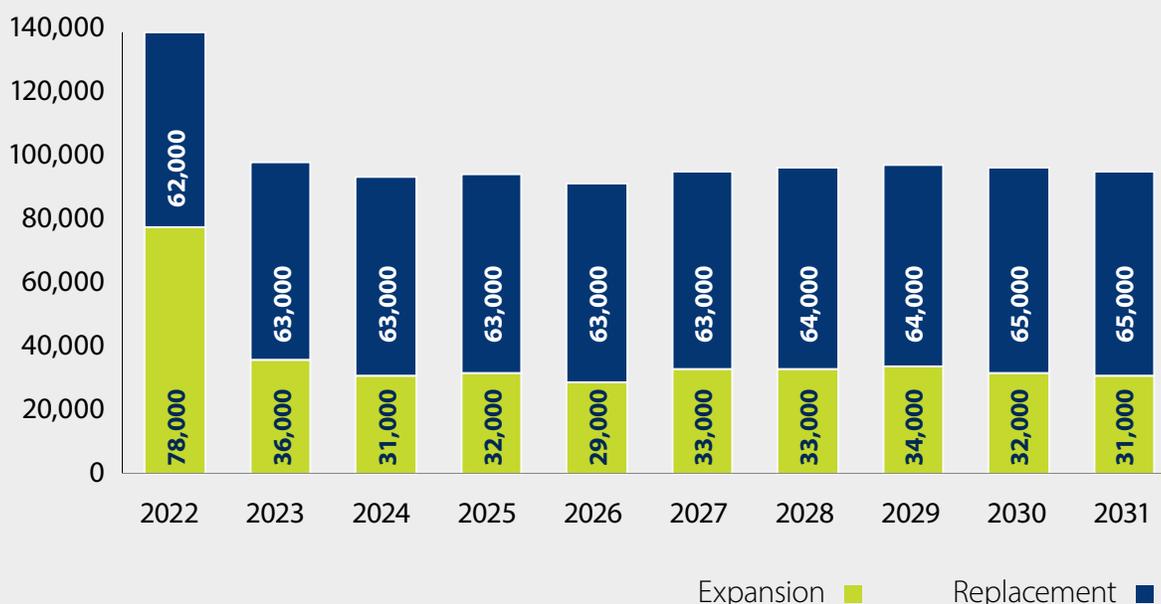

Figure 2-1 shows annual job openings, with a breakdown of replacement job openings and expansion job openings.

The number of job openings will increase by 140,000 in 2022, driven by sustained economic and labour market recovery from the COVID-19 pandemic. Between 2023 and 2031, analysts forecast 96,000 job openings each year on average, varying from a low of 92,000 in 2026 to a high of 98,000 in 2029.

The workforce in B.C. continues to age and more workers are going to retire. The number of replacement job openings will grow gradually year-over-year, ranging from 62,000 in 2022 to 65,000 in 2031. On average, close to 64,000 workers will leave the labour force permanently every year over the next decade.

Expansion job openings are created by economic growth. After a surge of 78,000 in 2022, which reflects the strong labour market recovery, expansion job openings will vary between 29,000 and 36,000 over the rest of the forecast period.

FIGURE 2-1: JOB OPENINGS, B.C., 2021-2031, ANNUAL

To fill those job openings in B.C. each year, the province will need a supply of labour from multiple sources, as shown in Figure 2-2. These will include young people starting work, international immigrants, inter-provincial migrants, and additional supply from increased labour force participation and reduced unemployment.

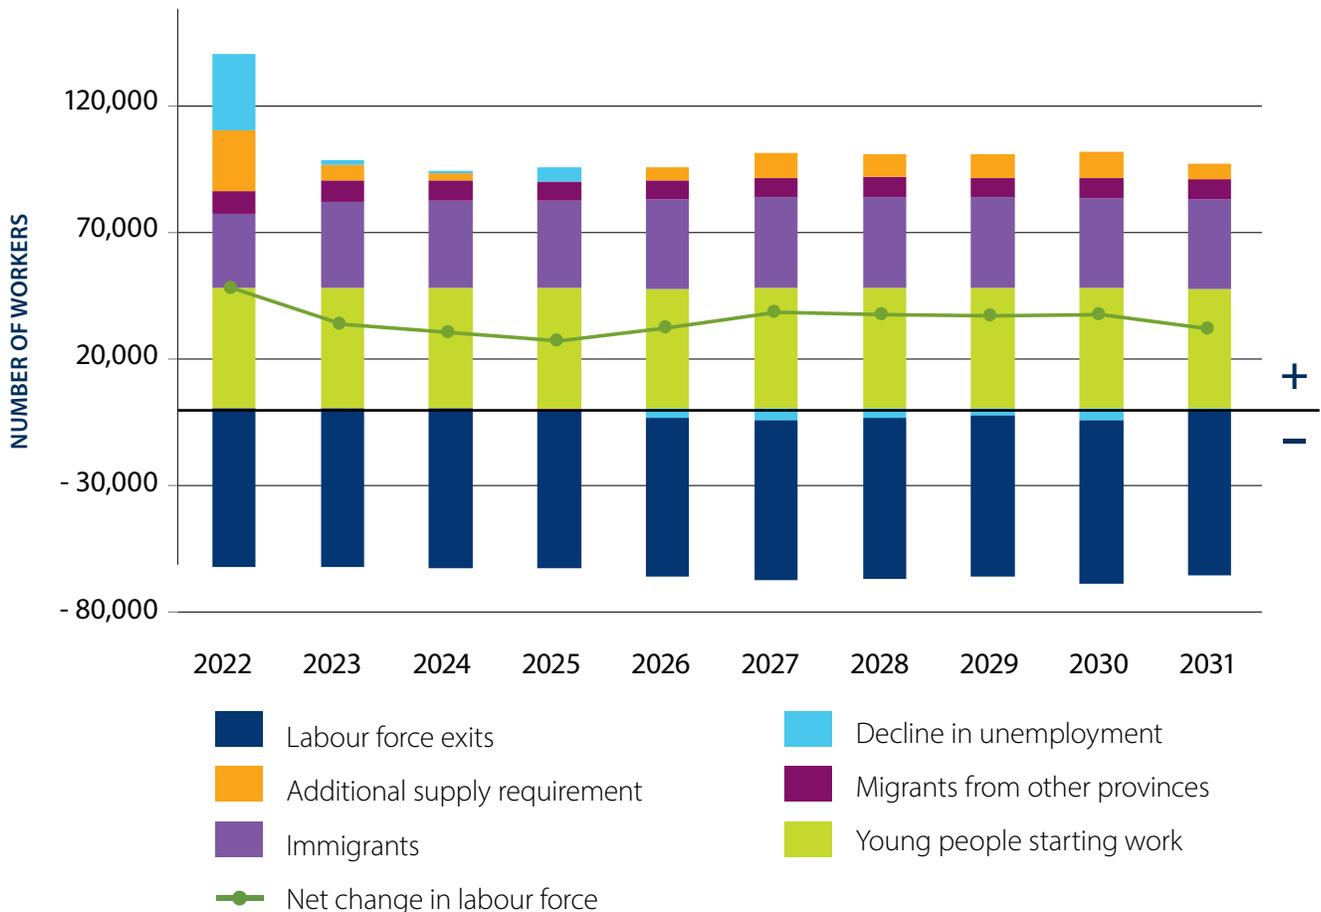

Young people entering the workforce for the first time will be the largest source of new labour supply. They will fill approximately 48,000 job openings or 48 per cent of the total job openings each year over the next 10 years. The annual number of young people starting work will be relatively stable over the forecast period. Figure 2-3 shows the numbers of young people joining the workforce in relation to total job openings.

New international immigrants form the second largest source of new workers. Almost 35,000 immigrants will join B.C.'s labour force each year on average between 2021 and 2031. While only 29,000 immigrants will join the labour force in 2022, 34,000 to 36,000 immigrants per year are expected in other years.

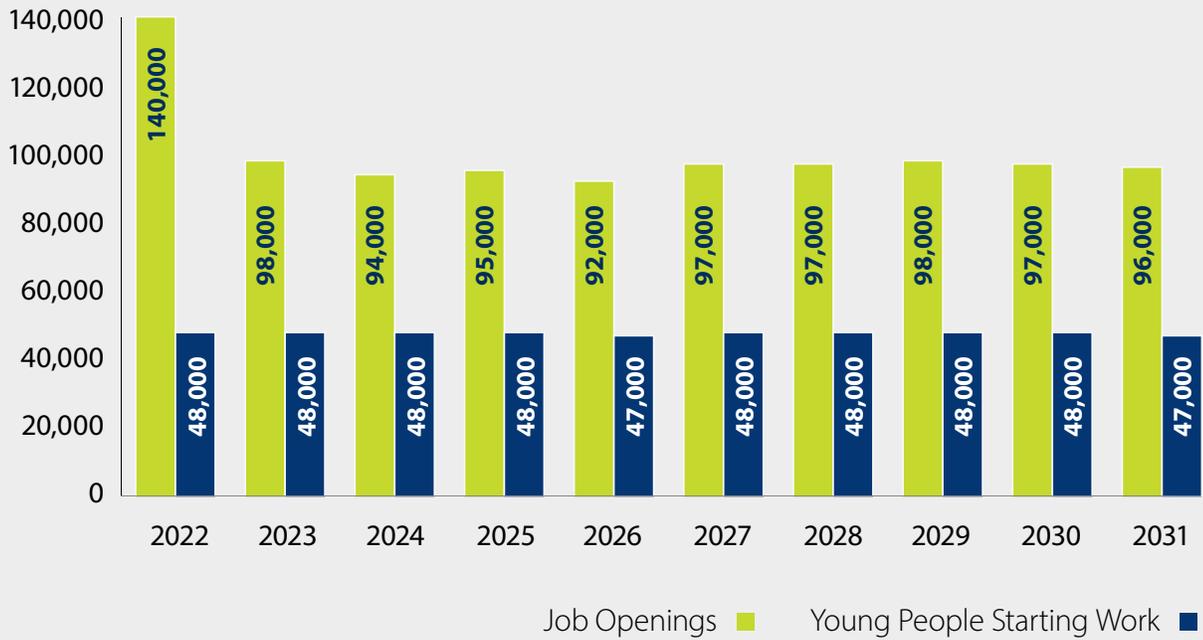

Migrants from other provinces and territories will play a comparatively limited role, supplying approximately 8,000 new workers annually, on average.

To meet the anticipated needs of the future workforce, B.C. cannot rely only on youth, immigrants, migrants from other provinces and lower unemployment. The province will need more than 8,000 additional workers each year (83,000 over the ten-year period) through increased labour force participation and/or increased use of automation and other labour saving processes.

FIGURE 2-2: SOURCES OF NEW WORKERS, B.C., 2021-2031, ANNUAL

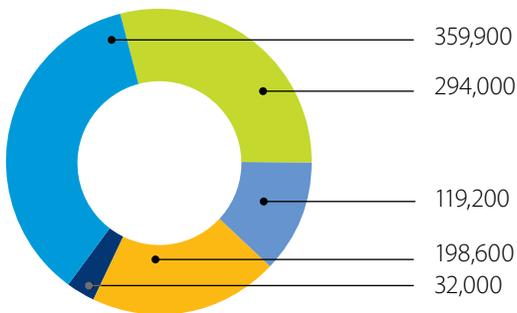

**FIGURE 2-3: JOB OPENINGS AND YOUNG PEOPLE STARTING WORK, B.C., 2021-2031, ANNUAL**

### 3.0 | Education and training needs

Of the 1,004,000 expected job openings in B.C. over the next decade, approximately **77 per cent (or 773,000 job openings) will require some level of post-secondary education or training**. Figure 3-1 shows the breakdown by education category. Note that in this report, the Diploma and certificate category has been split into two components: Apprenticeship certificate and Diploma/certificate excluding apprenticeship.

**FIGURE 3-1: JOB OPENINGS BY TYPE OF EDUCATION, B.C., 2021-2031**

#### EDUCATION REQUIREMENT

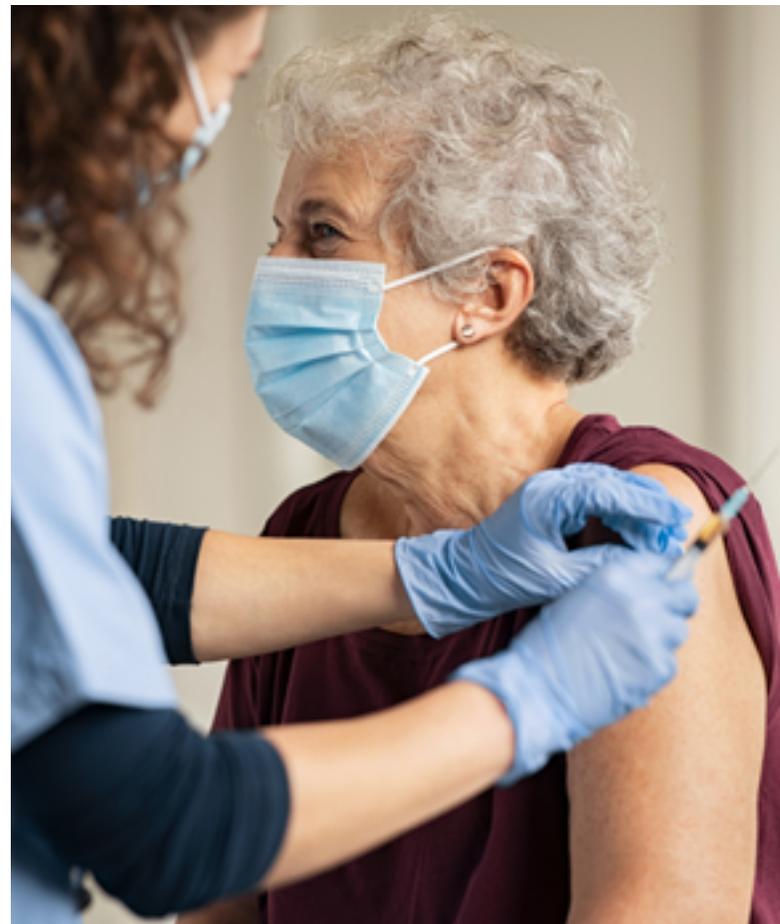

- Bachelor's, Graduate or First Professional Degree **(36%)**
- Diploma/Certificate Excluding Apprenticeship **(29%)**
- Apprenticeship Certificate **(12%)**
- High School and/or Occupation Specific Training **(20%)**
- Less than High School **(3%)**

Sources: Census 2016; LMO 2021 Edition

### 4.0 | Industry outlook

In British Columbia, **five industries will account for about half of the total job openings** projected over the next 10 years:

- **HEALTH CARE AND SOCIAL ASSISTANCE**  
(142,900 job openings; 14 per cent of total)
- **PROFESSIONAL, SCIENTIFIC AND TECHNICAL SERVICES**  
(140,700 job openings; 14 per cent of total)
- **RETAIL TRADE**  
(103,700 job openings; 10 per cent of total)
- **CONSTRUCTION**  
(75,900 job openings; 8 per cent of total)
- **ACCOMMODATION AND FOOD SERVICES**  
(65,000 job openings; 7 per cent of total)

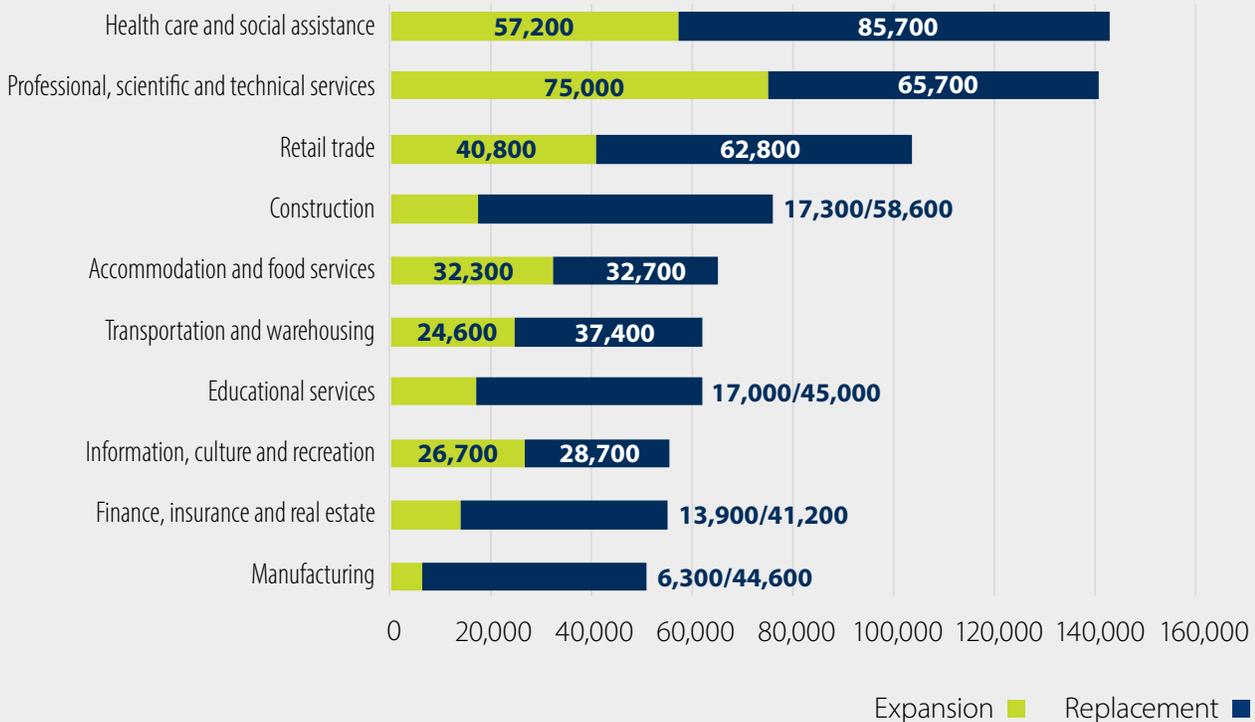

As B.C.'s population continues to age, Health care and social assistance will see the largest increase in job openings in the next 10 years. Of these openings, 60 per cent will come from the need to replace retiring workers, while the remaining 40 per cent will result from expansion of the health system in response to the growing medical needs of an aging population and the expansion of the care economy.

Professional, scientific and technical services has been a fast-growing industry and this trend will continue into the next decade. Economic growth will generate 53 per cent of the job openings in this industry, compared to 37 per cent of openings in all industries.

Future job openings in different industries come from the wide range of opportunities that will open up due to growth in B.C.'s economy and the need to replace retiring workers.

**FIGURE 4-1: JOB OPENINGS BY MAJOR INDUSTRY GROUP — TOP TEN, B.C., 2021-2031**

**Note:** Small discrepancies may arise due to rounding.

Figure 4-1 shows that the need to replace retiring workers will create over two thirds of job openings for half of B.C.'s major industries over the next 10 years. About 77 per cent of the construction industry job openings are to replace workers. The replacement job openings, when combined with expansion job openings, will create almost 76,000 openings in the construction industry.

The Accommodation services industry was severely affected by the COVID-19 pandemic. Employment in this industry is projected to recover to its 2019 level by 2027. Distancing measures due to COVID have inspired this sector to increase the use of technologies like online services, passcode-enabled self-check-in, security cameras and so forth. In addition, some business travel may be reduced permanently as businesses adopt new communication models.

The Computer systems design and related services industry was growing in B.C. well before the pandemic. The industry grew even faster during the pandemic because of increasing digitalization, automation and work from home. The industry is expected to grow at an annual rate of 5.4 per cent from 2021 to 2026, and 4.8 per cent from 2021 to 2031, the highest rate among all industries.

Several industries will have a high growth rate as they recover from the pandemic, including: Air transportation and support activities; Private and trades education; and Amusement, gambling and recreation industries.

The forecasts for all 61 industries and 18 aggregate industries are provided in Table 4-1.

**TABLE 4-1: DETAILED INDUSTRY OUTLOOK, B.C., 2021-2031**

Industry	Employment 2021	Employment Growth (Compound Annual Growth Rate, %)			Expansion Job Openings 2021- 2031	Replacement Job Openings 2021- 2031	Total Job Openings 2021- 2031
		2021- 2026	2026- 2031	2021- 2031			
<b>All industries</b>	<b>2,656,800</b>	<b>1.5</b>	<b>1.1</b>	<b>1.3</b>	<b>368,800</b>	<b>634,800</b>	<b>1,003,600</b>

## 5.0 | Occupational outlook

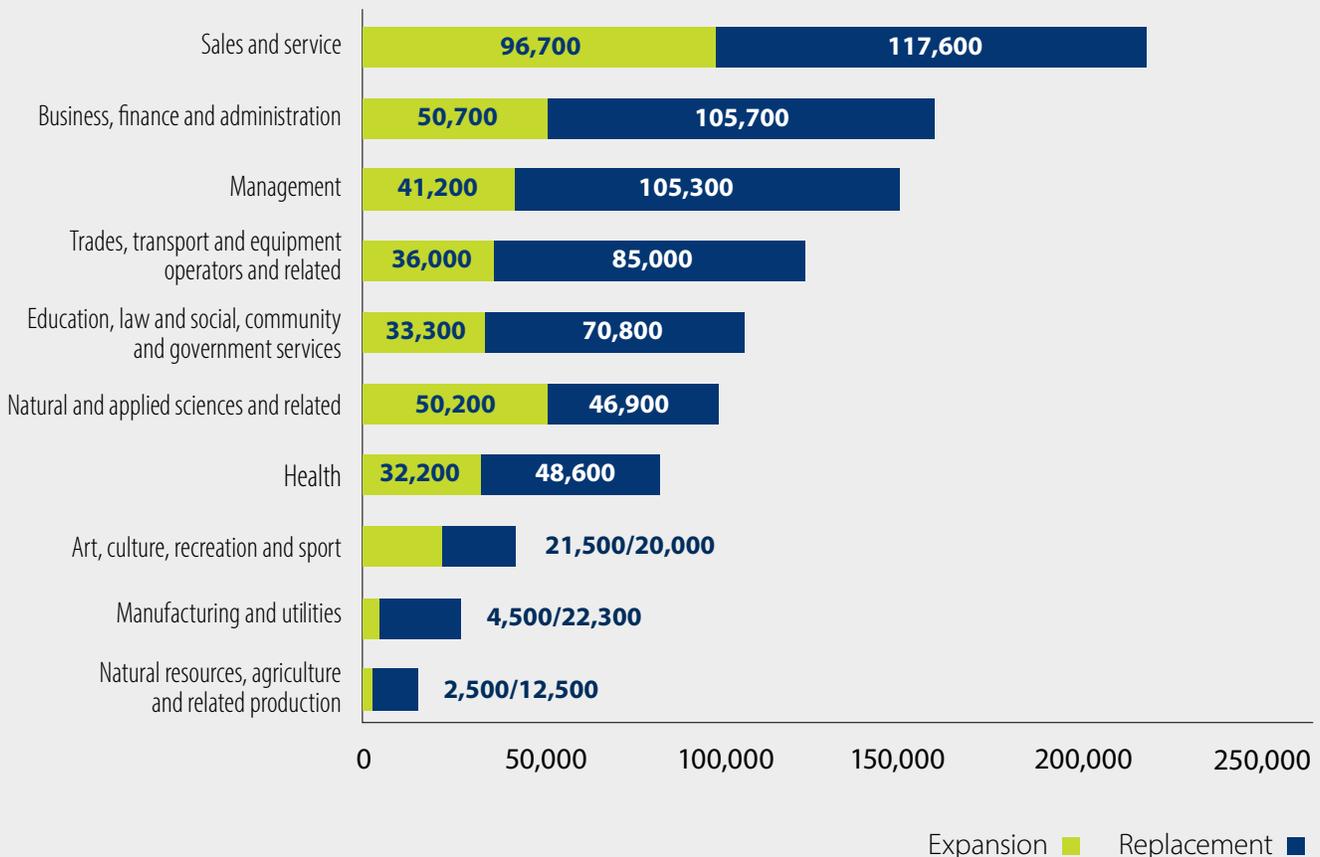

### 5.1 Overview

This report categorizes B.C.'s entire workforce into 10 major occupational groups, according to Canada's [National Occupational Classification](#) (NOC) 2016. Every occupational group will post some job openings – even industries with declining employment will have retiring workers who need to be replaced. Close to three-quarters (74 per cent) of the projected job openings in B.C. are expected to be among the top five occupational groups:

- **SALES AND SERVICE**  
(214,200 job openings; 21 per cent of total)
- **BUSINESS, FINANCE AND ADMINISTRATION**  
(156,400 job openings; 16 per cent of total)
- **MANAGEMENT**  
(146,600 job openings; 15 per cent of total)
- **TRADES, TRANSPORT AND EQUIPMENT OPERATORS AND RELATED**  
(121,000 job openings; 12 per cent of total)
- **EDUCATION, LAW AND SOCIAL, COMMUNITY AND GOVERNMENT SERVICES**  
(104,100 job openings; 10 per cent of total)

Figure 5.1-1 shows job openings for all 10 groups.

**FIGURE 5.1-1: JOB OPENINGS BY MAJOR OCCUPATIONAL GROUP, B.C., 2021-2031**

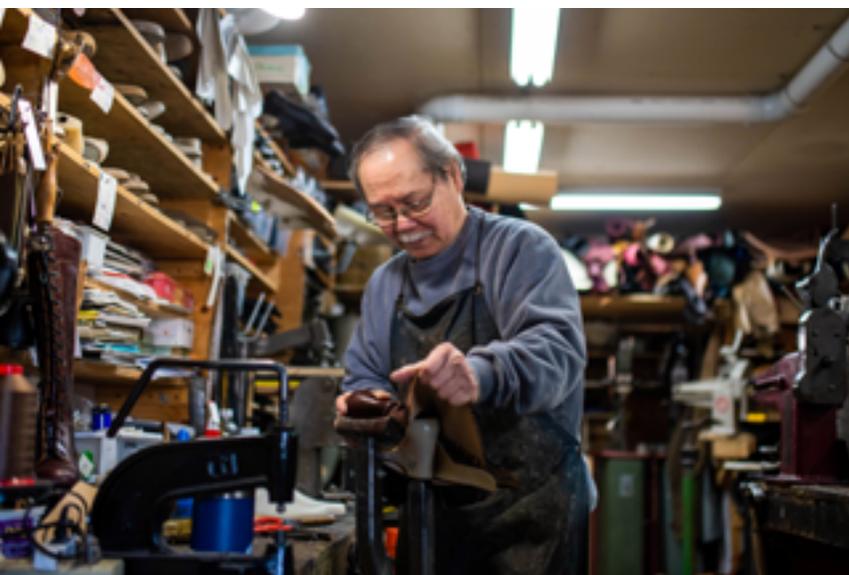

Some occupational groups are expected to grow faster than others. The Natural and applied sciences and related occupational group is forecasted to expand more rapidly than the other occupational groups. Accelerated digitalization will contribute to the occupational group's employment growth of 2.1 per cent annually. The Art, culture, recreation and sport occupational group will also grow strongly (1.9 per cent per year), as it recovers and increases from suppressed employment in 2021. As a result, for both occupational groups, 52 per cent of their total job openings will come from expansion demand, with the remaining 48 per cent from replacement.

For other occupational groups, the vast majority of their total job openings will come from replacement. In both the Manufacturing and utilities occupational group and the Natural resources, agriculture and related production group, the need to replace retiring workers accounts for over 80 per cent of the total job openings due to limited workforce expansion. For the Management occupational group, the replacement demand will account for over 70 per cent of total job openings, as this group has more older workers than other groups.

Figure 5.1-1 reflects standard National Occupation Classification grouping of occupations. Job openings in some special occupational groups include 111,000 in STEM (tech) occupations and 85,000 in skilled trades.

For the forecast of job openings for all 500 occupations, see Appendix 3.

## Top in-demand trades

About 85,000 job openings are expected in the skilled trades over the next 10 years. These occupations require on-the-job training and in-class training, and offer excellent earning potential.

The top 15 trades in terms of projected job openings over the next 10 years are:

- > Cooks
- > Auto service technicians
- > Construction trades helpers and labourers
- > Hairstylists and barbers
- > Carpenters
- > Construction electricians
- > Heavy equipment operators (except crane)
- > Painters and decorators (except interior decorators)
- > Welders and related machine operators
- > Plumbers
- > Bakers
- > Construction millwrights
- > Heavy-duty equipment mechanics
- > Aircraft mechanics
- > Plasterers, drywall installers

## 5.2 High Opportunity Occupations

The National Occupational Classification system classifies the whole workforce into 500 occupations. While some occupations may have more job openings than others, every occupation plays a role in the economy, contributing to the prosperity of B.C. However, certain occupations offer greater employment opportunities to both workers and the overall economy. The High Opportunity Occupations list identifies these occupations.

When compared to other occupations, High Opportunity Occupations will face stronger demand and offer better pay. B.C.'s list of High Opportunity Occupations helps people make informed decisions about their future career. It shows which occupations offer the most opportunity, as well as the education and training that each requires.

### Methodology

To create the list, all 500 occupations are examined using seven labour market indicators in four categories shown in Figure 5.2-1 and Table 5.2-1. These indicators provide information on current and future labour market conditions for each of the 500 occupations.

FIGURE 5.2-1: CRITERIA OF HIGH OPPORTUNITY OCCUPATIONS LIST

<b>1</b>	<p><b>How many job opportunities will be available?</b> The number of job openings and the strength in employment growth</p>
<b>2</b>	<p><b>How easy will it be to get a job in the future?</b> Forecast labour market tightness</p>
<b>3</b>	<p><b>How easy is it to get a job now?</b> Most recent unemployment and employment insurance rates</p>
<b>4</b>	<p><b>How much is the wage?</b> Current wage rate</p>

Each indicator is given a weight (from 10 to 20 per cent) to reflect how much it affects labour market conditions. Each occupation receives a composite weighted score based on these indicators and weights. Table 5.2-1 shows the factors in the composite score.

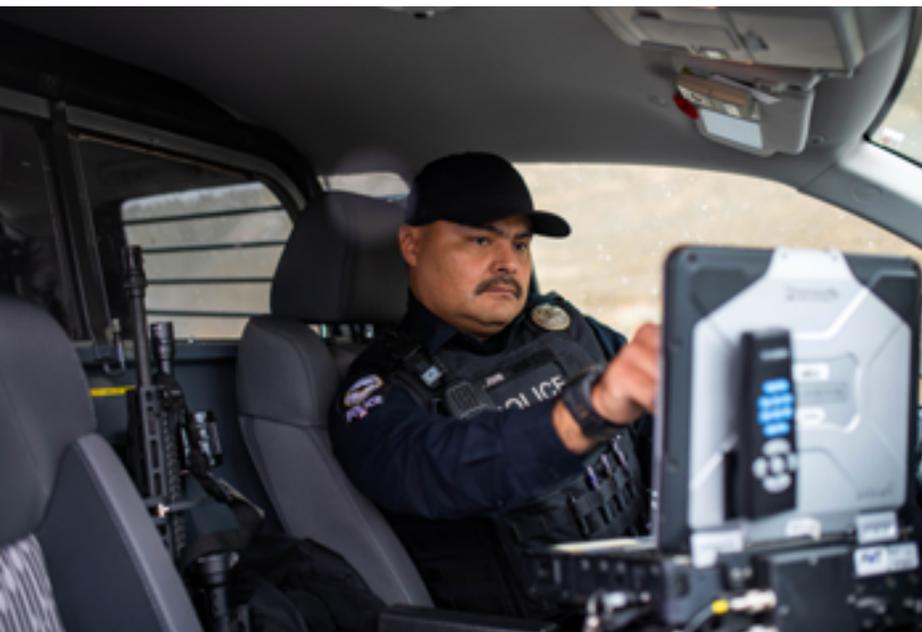

TABLE 5.2-1: COMPONENTS OF THE OPPORTUNITY INDICATOR RANKING

INDICATOR AND WEIGHT	RATIONALE
<b>How many job opportunities will be available?</b>	<b>Absolute and relative job opportunities</b>
<ul style="list-style-type: none"> <li>➤ Forecasted number of job openings (20 per cent)</li> <li>➤ Ratio of job openings to employment (10 per cent)</li> <li>➤ Forecasted employment growth rate (20 per cent)</li> </ul>	<ul style="list-style-type: none"> <li>➤ Occupations with a larger number of job openings, both the level and the ratio to employment, offer more opportunities to job seekers and have a bigger impact on the overall economy.</li> <li>➤ Occupations with faster forecasted employment growth offer more new job opportunities to job seekers.</li> </ul>
<b>How easy will it be to get a job in the future?</b>	<b>Occupations with more limited future supply relative to demand</b>
<ul style="list-style-type: none"> <li>➤ Forecasted unemployment rate (20 per cent)</li> </ul>	<ul style="list-style-type: none"> <li>➤ Occupations with a lower expected unemployment rate will offer more job opportunities to job seekers in the future</li> </ul>
<b>How easy is it to get a job now?</b>	<b>Occupations with more limited current supply relative to demand</b>
<ul style="list-style-type: none"> <li>➤ Recent unemployment rate (10 per cent)</li> <li>➤ Ratio of employment insurance beneficiaries to employment (10 per cent)</li> </ul>	<ul style="list-style-type: none"> <li>➤ Occupations with a lower unemployment rate and a lower ratio of employment insurance beneficiaries to employment offer more opportunities to job seekers.</li> </ul>
<b>How much is the wage?</b>	<b>Wage rate</b>
<ul style="list-style-type: none"> <li>➤ Current wage rate (10 per cent)</li> </ul>	<ul style="list-style-type: none"> <li>➤ Occupations with a higher wage rate represent better opportunities.</li> </ul>

The selection of the High Opportunity Occupations (HOO) is based on the ranking of all 500 occupations by the composite score. The top 125 occupations from this ranking form the main part of the HOO list. Then an additional five occupations are added to this list that typically require only high school education. This ensures that lower skilled opportunities are also represented on the list. The result is a list of 130 occupations identified as High Opportunity Occupations for B.C. at the provincial level, shown in Table 5.2-2.

The 2021 Labour Market Outlook uses the same methodology as the 2019 report in developing High Opportunity Occupations.

The [Career Transition Tool](#) and [High Opportunity Occupations Tool](#), both available at WorkBC.ca, provide HOO listings at the provincial and regional level. This reflects the unique mix of industries and occupations in each region of B.C. The regional lists allow users to focus on a single region. For example, a job seeker might be interested only in the Cariboo. The province-wide HOO list would be misleading because it would include occupations that are available in other regions but not in the Cariboo.

The regional lists use the same methodology as the provincial HOO list but the occupations reflect the regional labour market. At the regional level, the HOO list includes the top 125 occupations in the region or the top occupations that account for up to 50 per cent of the regional job openings.

**TABLE 5.2-2: LIST OF HIGH OPPORTUNITY OCCUPATIONS, BY TYPICAL EDUCATION BACKGROUND B.C., 2021-2031**

0631	Restaurant and food service managers	9,320	\$15.00	\$25.00	\$38.46	Enterprising	High school
7451	Longshore workers	2,280	\$25.00	\$42.00	\$47.32	Realistic	High school
8255	Contractors and supervisors, landscaping, grounds maintenance and horticulture services	2,150	\$15.00	\$25.00	\$41.67	Realistic	High school
1512	Letter carriers	1,930	\$20.00	\$23.00	\$27.23	Conventional, Realistic	High school
6533	Casino occupations	1,920	\$14.60	\$20.00	\$25.00	Conventional, Enterprising	High school
6315	Cleaning supervisors	700	\$16.83	\$26.92	\$42.74	Realistic	High school

**Notes:**

- Job openings are rounded to the nearest ten.
- The wage rate refers to the Job Bank hourly wage rate (from Employment and Social Development Canada), which was updated in 2020, unless otherwise noted.
- For occupations with a “\*\*”, the annual wage rate is provided because the hourly wage rate is not available. In some cases, no wage data is available and this is denoted by a “-”.
- **Description of Occupational Interests:**
  - Artistic:** You love working with forms, designs and patterns. You prefer self-expression, and what you create doesn't always follow a clear set of rules.
  - Enterprising:** You enjoy starting and carrying out the plans for your projects, making decisions and leading people. You're not afraid of taking a risk, and you tend to prefer a business environment.
  - Hands-on or Realistic:** You like clear and practical activities: projects where you can work with your hands, inside or outside, with minimal paperwork.
  - Routinized or Conventional:** You prefer a clear line of authority and defined procedures and routines, with everything in its place and a place for everything.
  - Investigative:** Finding the facts and searching for solutions makes you happy, and you're not afraid of a good mental workout.
  - Social:** Helping people or providing services to others gets you out of bed in the morning, whether you're teaching, working or communicating with them.

## 5.3 Demand for skills and competencies

British Columbians will need a strong foundation of skills and workforce competencies as they plan their career paths and pursue the opportunities offered in the 21st century economy.

This report uses the following terms as defined in the U.S. Occupational Information Network (O\*NET) Content Model:

- **Skill** is the ability to perform tasks based on one's knowledge, learning or practice.
- **Competency** is the ability to apply skills and knowledge to perform complex tasks well and to adapt easily to the activities of a variety of jobs.

In this report, the term “skills” refers to “skills and competencies” unless specified. Appendix 1 gives additional definitions.

Technological advancements such as artificial intelligence, robotics and automation, along with demographic and socio-economic shifts, are shaping the future demand for skills and competencies in the labour market. All of these changes have also been significantly impacted by the ongoing COVID-19 pandemic.

B.C.'s 2018 Labour Market Outlook published a list of in-demand skills and competencies. The list was developed by mapping occupational outlooks for 2018 to 2028 to skills data. The in-demand skills forecast needs updating in light of workplace adaptations to new ways of working, 2021 to 2031 occupational outlooks and updated skills data.

Job seekers and workers can benefit by understanding the skills and competencies employers need. Identifying and gaining the skills needed for the future will help job seekers find jobs and career success. This section describes the skills and competencies that future job openings in British Columbia will call for.

The 2021 Labour Market Outlook estimates the demand for skills and competencies for 500 NOC occupations<sup>4</sup> by linking B.C.'s projected job openings (listed in Appendix 4) to the U.S. Labour Department dataset called **O\*NET** (Occupational Network information, O\*NET 26.0 Database, August 2021). is one of the world's largest, most comprehensive, widely used public repositories for skills data at the occupational level. The projection is based on the current structure of the skills and competencies required for each occupation. Since comparable information for Canada is not available, O\*NET is considered to be sufficiently relevant to the B.C. situation until data for Canada becomes available. Figure 5.3-1 summarizes these results.

The study reveals a strong demand for people skills – namely communication skills such as Active listening, Speaking and Reading comprehension – as well as Critical thinking (see Appendix 1 for definitions). Among the competencies, Social perceptiveness, Judgment and decision making, and Complex problem solving are deemed as “very important” for almost 40 per cent of the total projected job openings by 2031.

The findings do not show strong demand for digital skills<sup>5</sup> such as Programming, Technology design, System analysis and System evaluation since they are critical for some specific occupations, but not used widely across a range of occupations.

4. NOC stands for Canada's National Occupational Classification. Ten occupations have been dropped out through the process of mapping the O\*NET dataset in SOC (Standard Occupational Classification) to NOC (National Occupational Classification), including Legislators (NOC 0011), Financial and investment analysts (NOC 1112), Health information management occupations (NOC 1252), Industrial instrument technicians and mechanics (NOC 2243), Employment counsellors (NOC 4156), Non-commissioned ranks of the Canadian Armed Forces (NOC 4313), Elementary and secondary school teacher assistants (NOC 4413), Other personal service occupations (NOC 6564), Taxi and limousine drivers and chauffeurs (NOC 7513), and Logging and forestry labourers (NOC 8616). This accounted for 1.2 per cent of total projected job openings in British Columbia from 2021 to 2031.

5. Employment and Social Development Canada (ESDC) defines digital skills as the ability to use digital technology and tools to find, manage, apply, create and share information and content (<https://www.canada.ca/en/services/jobs/training/initiatives/skills-success/understanding-individuals.html>). Digital skills are not directly identified in the O\*NET Content Model, but they are classified as different skills using different terminology, such as programming, technology design, system analysis and system evaluation.

## Top skills of the future

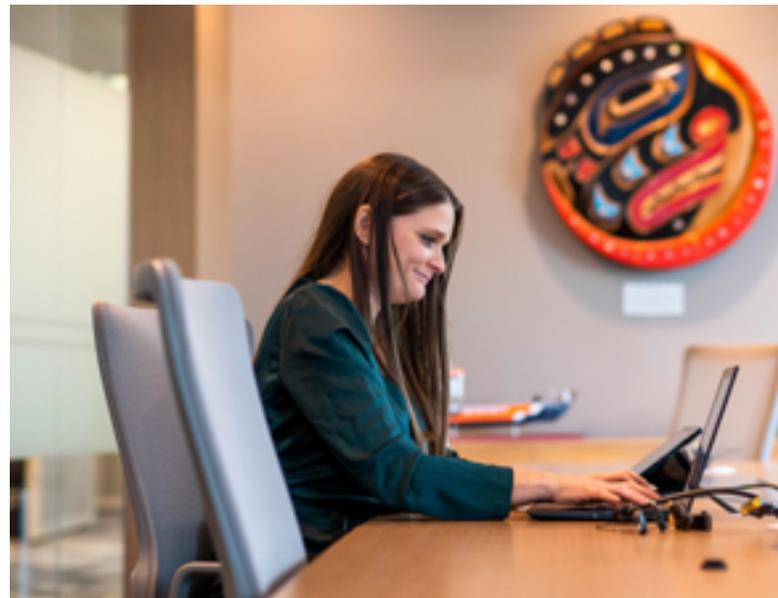

- **ACTIVE LISTENING** is identified as a very important skill for 71 per cent of total projected job openings in B.C.
- **SPEAKING** is very important for 63 per cent of job openings.
- **CRITICAL THINKING** is very important for 56 per cent of job openings.
- **READING COMPREHENSION** is very important for 55 per cent of job openings.

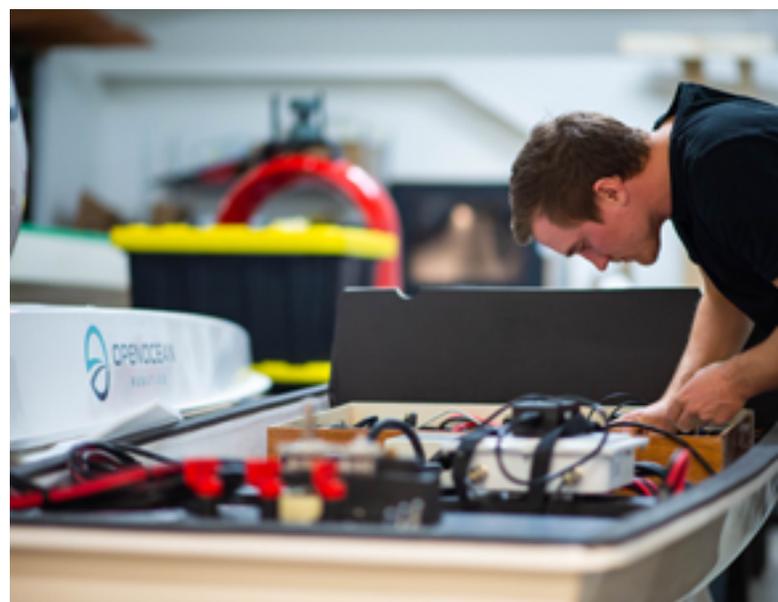

## Top competencies of the future

- **SOCIAL PERCEPTIVENESS, JUDGMENT AND DECISION MAKING, and COMPLEX PROBLEM SOLVING** are identified as very important for almost 40 per cent of job openings.

Please see Figure 5.3-1 for more details.

The competencies required to do a job vary across occupational groups. For instance, Social perceptiveness and Service orientation are very important for Health as well as Sales and service occupations, while Operations monitoring is essential for Trade, transport and equipment operators and related occupations, as well as for Occupations in manufacturing and utilities. Figure 5.3-2 shows the projected demand for skills and competencies by occupational group.

As with the projected in-demand skills, the findings for the occupational groups also show the importance of Communication skills and Critical thinking.

The top 10 in-demand skills and competencies for 2021 to 2031 are consistent with those projected for 2018 to 2028. However, some skills that employers identified as very important changed in ranking or in the share of projected job openings.

Critical thinking and Monitoring have higher rankings in 2031 compared to 2028. These skills will be increasingly important for workers to remain competitive in 2031. Moving towards the digital age – where machines might take over many routine, repetitive, technical tasks – non-routine skills (such as Critical thinking, Leadership and Negotiation) are important and cannot be replaced by technology. The World Economic Forum [Future of Jobs Report 2020](#) says that automation will increase the share of the use of technologies in production processes from 33 per cent in 2020 to 47 per cent

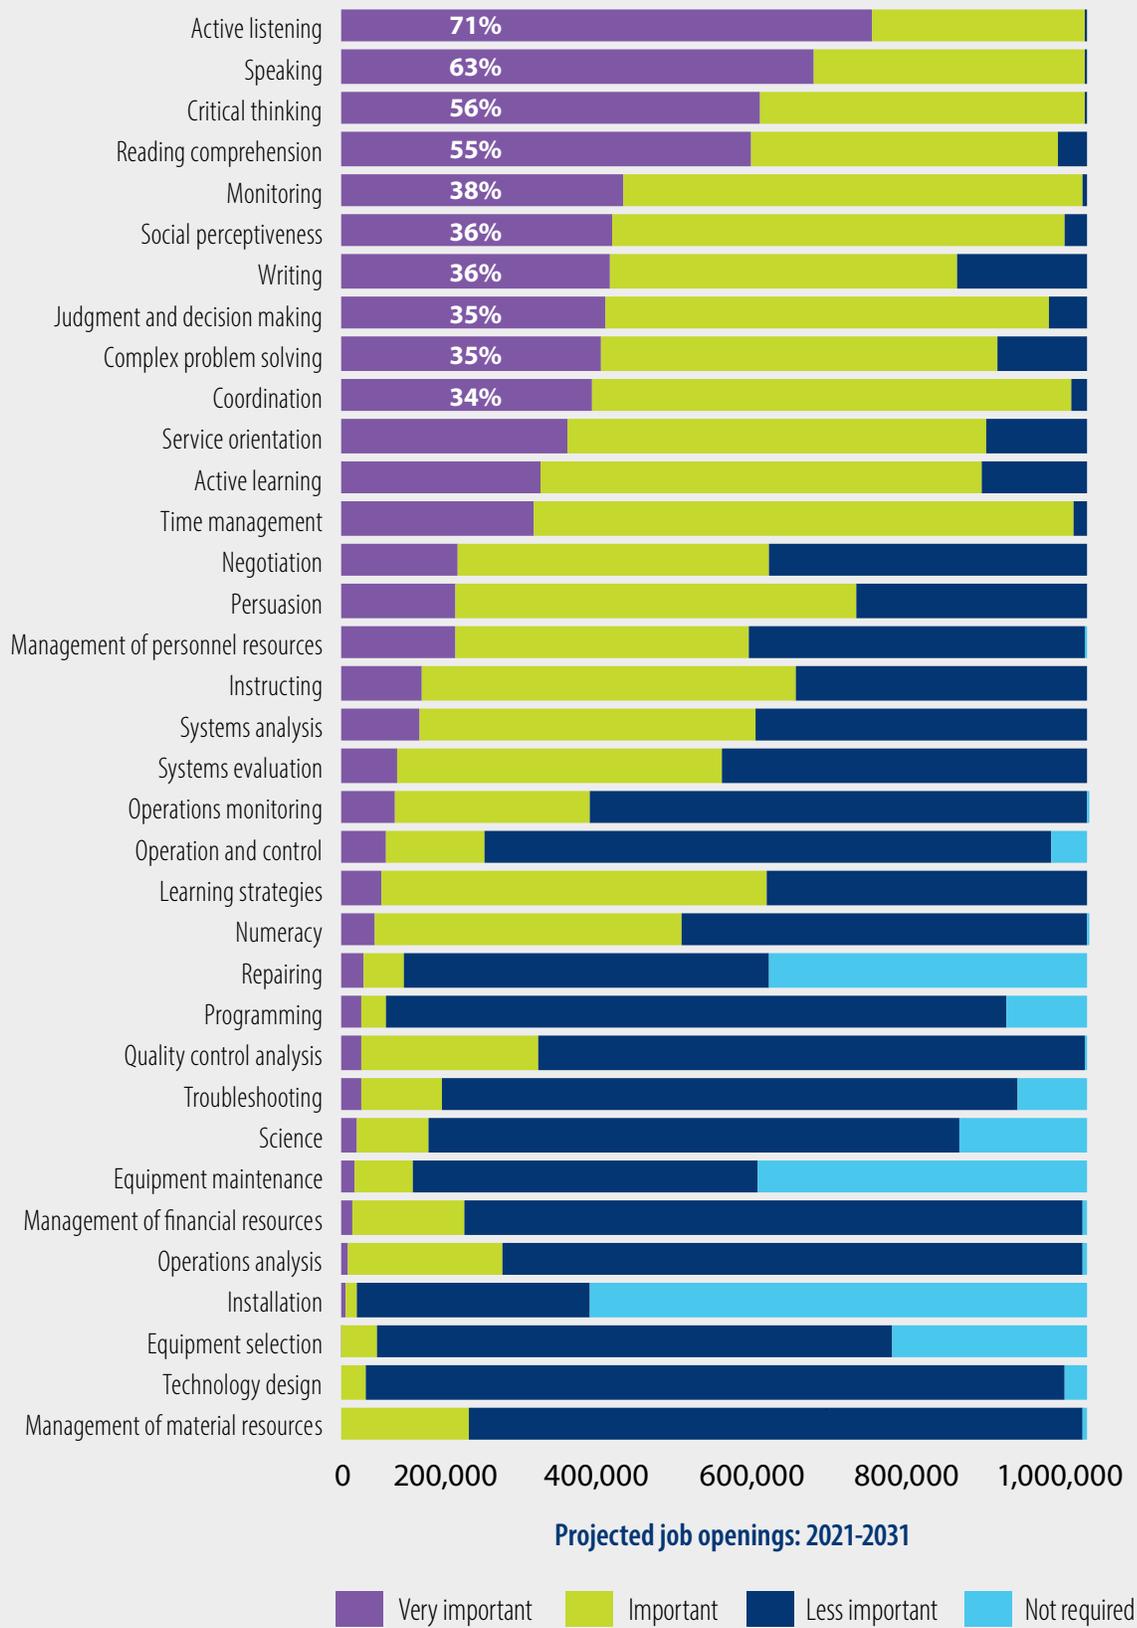

in 2025. While many processes will become automated, more people will be needed to create, apply and monitor the technologies. On the other hand, Reading comprehension, Social perceptiveness, and Judgment and decision making will become slightly less important in 2031 than in 2028. (Table 5.3-1 lists the top 10 future skills and competencies for 2028 and 2031.)

As the types of skills and competencies needed in the labour market continually shift and evolve, B.C. will need to align its workforce to meet the demands of a changing world. Employees who want to stand out in the labour market can upgrade their credentials by learning new skills and competencies, and improving their existing ones.

Continuing education and training programs, at all levels, are necessary to give the workforce the opportunities to upgrade their abilities to succeed in the economy of today and tomorrow.

FIGURE 5.3-1: PROJECTED DEMAND FOR SKILLS AND COMPETENCIES, B.C., 2021-2031

**Note:** The chart indicates the share of projected job openings in descending order for each of the 35 work-related skills and competencies identified as very important.

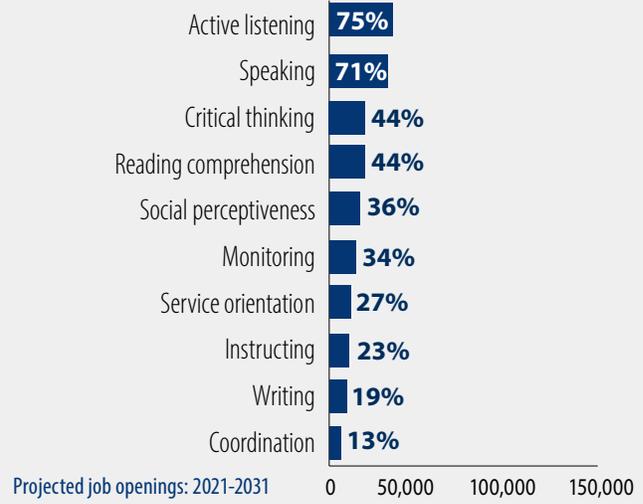

**Source:** The analysis was based on the U.S. Department of Labor, Employment and Training Administration's [O\\*NET database](#) version 26.0, released in August 2021, and British Columbia Labour Market Outlook: 2021 Edition.

**FIGURE 5.3-2: PROJECTED DEMAND FOR SKILLS AND COMPETENCIES BY OCCUPATIONAL GROUP, B.C., 2021-2031**

**Management occupations**

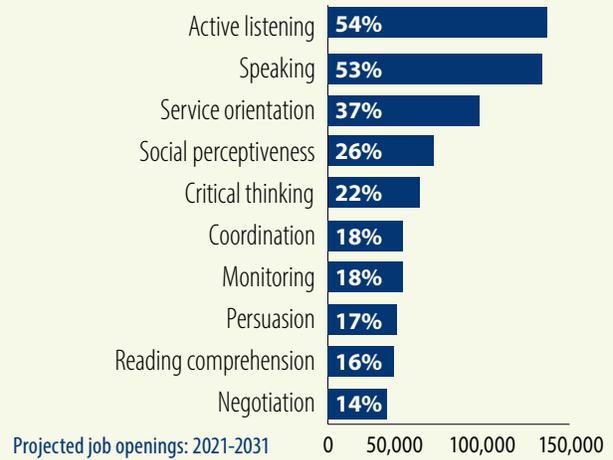

**Occupations in art, culture, recreation and sport**

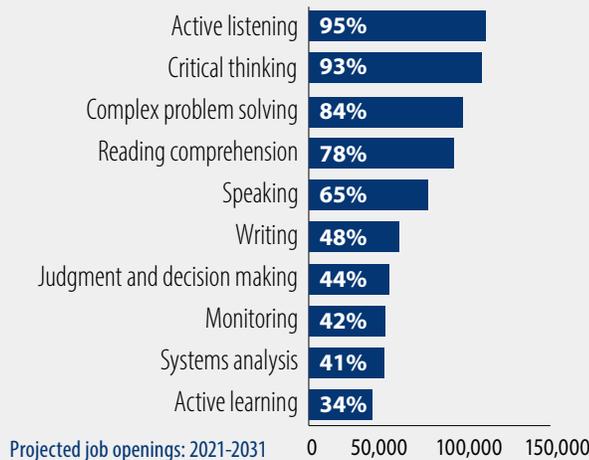

**Business, finance and administrative occupations**

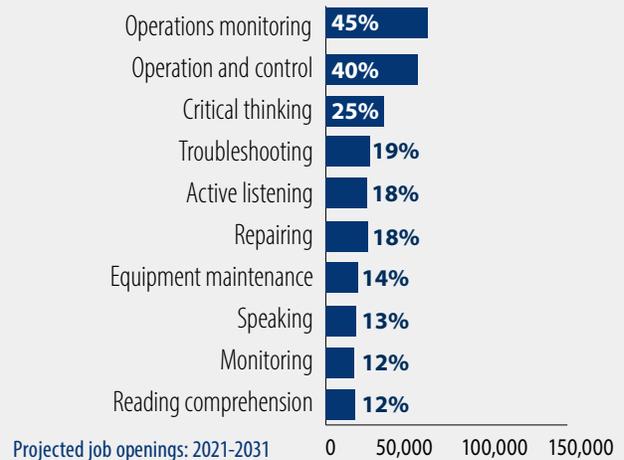

**Sales and service occupations**

**Natural and applied science and related occupations**

**Trade, transport and equipment operators and related occupations**

**FIGURE 5.3-2: PROJECTED DEMAND FOR SKILLS AND COMPETENCIES BY OCCUPATIONAL GROUP, B.C., 2021-2031 (Continued)**

**Health occupations**

Projected job openings: 2021-2031 0 50,000 100,000 150,000

**Natural resources, agriculture and related production occupations**

Projected job openings: 2021-2031 0 50,000 100,000 150,000

**Occupations in education, law and social, community and government services**

Projected job openings: 2021-2031 0 50,000 100,000 150,000

**Occupations in manufacturing and utilities**

Projected job openings: 2021-2031 0 50,000 100,000 150,000

**Note:** The length of the bars indicates the share of projected job openings that employers identified as “very important”. The percentage figure on the bars expresses the share of total projected job openings of each occupational group for work-related skills and competencies that employers identified as “very important” in descending order.

**Source:** The analysis was based on the U.S. Department of Labor, Employment and Training Administration’s O\*NET database version 26.0, released in August 2021, and British Columbia Labour Market Outlook: 2021 Edition.

## 6.0 | Regional outlook

B.C. and its seven economic regions have unique economies and labour market conditions. As a result, each offers a distinct variety of job opportunities.

This section highlights the opportunities within each economic region. The map below identifies the seven regions and Table 6-1 summarizes the projected job openings in each region.

**TABLE 6.1: EMPLOYMENT AND JOB OPENINGS BY DEVELOPMENT REGION**

Region	Employment 2021	10-Year Employment Growth Rate 2021-2031	Job Openings 2021-2031		
			Expansion	Replacement	Total
Vancouver Island/Coast	425,000	1.1%	50,400	111,000	161,500
Mainland/Southwest	1,680,000	1.4%	260,000	393,200	653,200
Thompson-Okanagan	303,000	1.2%	38,600	77,000	115,600
Kootenay	80,000	0.6%	5,100	20,400	25,400
Cariboo	87,000	0.4%	3,700	16,700	20,400
Northeast	39,000	1.0%	4,300	8,000	12,300
North Coast and Nechako	43,000	1.4%	6,700	8,500	15,200
<b>British Columbia</b>	<b>2,657,000</b>	<b>1.3%</b>	<b>368,800</b>	<b>634,800</b>	<b>1,003,600</b>

**Note:** Small discrepancies may arise due to rounding.

## 6.1 | Vancouver Island/Coast

Vancouver Island/Coast is British Columbia's second most populated region. Much of this area remains rural and sparsely populated. The vast majority of residents live in the capital region around Victoria and in the mid-island region stretching from Duncan north to Campbell River.

With its scenic location and mild climate, the region attracts retirees. In recent years younger people have moved into the area to avoid the competitive housing market in Mainland/Southwest. The region's population is older than the provincial average. Its labour force participation is the lowest among regions (at 59 per cent in 2020).

The Vancouver Island/Coast region accounts for about 16 per cent of B.C.'s workers. Its unemployment rate in 2020 (8.7 per cent) was slightly lower than the B.C. average (8.9 per cent).

The largest industries, by employment size, are Other retail trade (excluding cars, online shopping and personal care); Construction; Food services and drinking places; Hospitals; and Provincial and territorial public administration.

In the coming 10 years, the Vancouver Island/Coast region is expected to have 161,500 job openings, of which 69 per cent will replace retiring workers. Employment demand is projected to increase by an annual average of 1.1 per cent, a bit slower than the provincial average (1.3 per cent).

Employment opportunities in the region are dominated by service-based industries, which is reflected in the top 10 industries with forecasted job openings through 2031.

**TABLE 6.1-1: TOP 10 INDUSTRIES BY JOB OPENINGS, VANCOUVER ISLAND/COAST, 2021-2031**

Industry	Employment 2021	Employment Growth Rate			Job Openings 2021-2031			Annual Replacement Rate
		2021-26	2026-31	2021-31	Expansion	Replacement	Total	
Other retail trade (excluding cars, online shopping and personal care)	40,360	0.8%	0.5%	0.6%	2,650	8,370	11,030	2.0%
Construction	37,840	0.3%	-0.4%	0.0%	-350	10,240	9,880	2.7%
Business and building support services (excluding travel)	18,700	1.8%	2.0%	1.9%	3,950	4,980	8,930	2.4%
Ambulatory health care services	18,960	1.3%	2.1%	1.7%	3,460	5,240	8,710	2.6%
Computer systems design and related services	9,200	4.9%	4.9%	4.9%	5,730	2,870	8,600	2.4%
Hospitals	22,140	0.7%	1.1%	0.9%	2,090	5,800	7,890	2.5%
Personal, non-automotive repair and non-profit services	15,930	2.9%	1.2%	2.0%	3,640	4,130	7,770	2.3%
Food services and drinking places	22,450	1.9%	0.9%	1.4%	3,390	3,910	7,300	1.6%
Nursing and residential care facilities	12,690	1.9%	3.3%	2.6%	3,770	3,460	7,230	2.4%
Provincial and territorial public administration	19,240	0.4%	0.2%	0.3%	550	5,780	6,330	2.9%

**Note:** Small discrepancies may arise due to rounding.

## Vancouver Island/Coast

Over the 10 years of the forecast, the region's fastest growing sectors are expected to be Mining; Support activities for mining and oil and gas extraction; Online shopping; and Food, beverage and tobacco manufacturing.

**TABLE 6.1-2: TOP OCCUPATIONS BY EDUCATION, VANCOUVER ISLAND/COAST, 2021-2031**

Typical Education Background	NOC	Occupation Title	Employment 2021	Expansion 2021-31	Replacement 2021-31	Total Job Openings 2021-31

## 6.2 | Mainland/Southwest

Vancouver is the centre of this region, which extends east through the Fraser Valley to Hope and north to Lillooet. The region shares a border with the U.S. While it is geographically the smallest region in B.C., it has the highest population and is economically the most significant in the province.

Mainland/Southwest is home to 63 per cent of B.C.'s population and has one of the youngest populations in the province. It employs about 64 per cent of B.C.'s workers.

The region's participation rate (64.8 per cent in 2020) is above the provincial average (63.6 in 2020). The unemployment rate was 9.0 per cent, slightly above the B.C. average (8.9 per cent).

The largest industries by employment size are Construction; Retail trade; Food services and drinking places; and Hospitals.

Up to 2031, a total of 653,200 job openings are anticipated. About 60 per cent of these job openings will replace exiting workers, while the remaining 40 per cent will come from economic growth. The total makes up almost two-thirds of B.C.'s total forecasted job openings over the next 10 years.

Employment demand is anticipated to increase 1.4 per cent on average every year over the next 10 years, similar to B.C.'s average annual growth.

Mainland/Southwest makes up almost two-thirds of B.C.'s total forecasted job openings during the coming decade.

**TABLE 6.2-1: TOP 10 INDUSTRIES BY JOB OPENINGS, MAINLAND/SOUTHWEST, 2021-2031**

**Note:** Small discrepancies may arise due to rounding.

## Mainland/Southwest

Over the 10-year forecast, the region's fastest growing sectors are expected to be Computer systems design and related services; Air transportation and support activities; Ship and boat building; Amusement, gambling and recreation industries; and Travel arrangement services. For Computer systems design and related services, the growth continues from the pre-pandemic period. For the other sectors, the high growth mostly reflects a recovery from the pandemic.

## 6.3 | Thompson-Okanagan

Thompson-Okanagan includes B.C.'s biggest wine and fruit producing area – the Okanagan Valley – as well as two big urban centres – Kelowna and Kamloops. The region is located in the southern interior of B.C. and shares a border with the U.S.

About 11 per cent of B.C. residents live in the region. The population in Thompson-Okanagan is older than the rest of the province. The region accounts for about 11 per cent of the province's total jobs.

The region's unemployment rate in 2020 was 8.6 per cent, slightly lower than the B.C. average (8.9 per cent). The labour force participation rate in the region was 62.7 per cent in 2020, slightly lower than the provincial average (63.6 in 2020).

In terms of employment size, Thompson-Okanagan's top industries are Construction; Other retail trade (excluding cars, online shopping and personal care); Hospitals; and Food services and drinking places.

Over the 10-year forecast period, employment demand is anticipated to increase by 1.2 per cent on average each year and 115,600 job openings are expected. Of these, 67 per cent will replace retirees and the remaining 23 per cent will come from economic growth.

**TABLE 6.3-1: TOP 10 INDUSTRIES BY JOB OPENINGS, THOMPSON-OKANAGAN, 2021-2031**

Industry	Employment 2021	Employment Growth Rate			Job Openings 2021-2031			Annual Replacement Rate

## 6.4 | Kootenay

The Kootenay economic region is situated in the southeast of the province, along the Rockies and the Canada/U.S. border. The rural areas are rich in natural resources.

The region is the province's second smallest, home to 3 per cent of B.C.'s residents and workers. In 2020, its unemployment rate was 9.6 per cent – the second highest among the regions. The labour force participation rate of 62 per cent in 2020 was lower than the provincial average (63.6 in 2020).

The largest industries in the Kootenay area are service-based and natural resource focused: Other retail trade; Mining; Construction; Elementary and secondary schools; and Food services and drinking places.

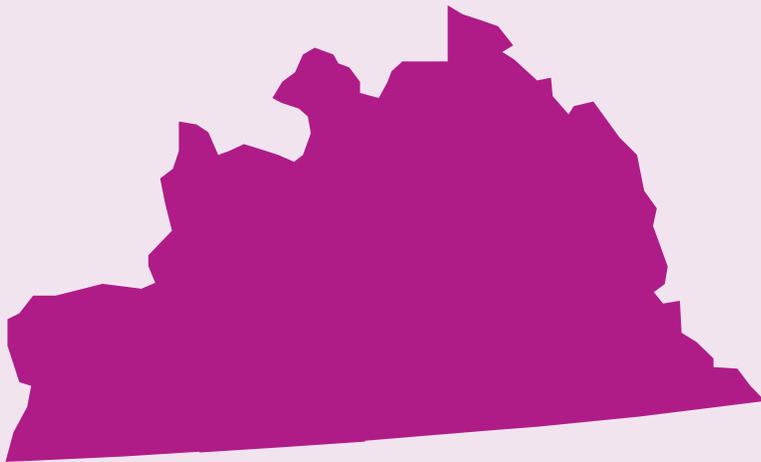

Up to 2031, 25,400 job openings are expected in this region. About 20 per cent of these will come from economic growth, and the rest from retirements.

Employment demand is forecasted to increase at an average of 0.6 per cent each year for the next 10 years, below the provincial rate of 1.3 per cent.

**TABLE 6.4-1: TOP 10 INDUSTRIES BY JOB OPENINGS, KOOTENAY, 2021-2031**

## 6.5 | Cariboo

The Cariboo region is in the centre of B.C. It contains many logging towns in mostly rural areas with large forests. Besides the urban centre of Prince George, the area is known for the logging hubs of Williams Lake and Quesnel.

The region is the third largest in geographical size, but only 3 per cent of B.C. residents live and work here.

The Cariboo region has one of the youngest populations, leading to the second highest participation rate in the province, two points above the provincial average (63.6 in 2020). The unemployment rate in 2020 was

10 per cent, the highest in the province. The provincial average unemployment rate was 8.9 per cent.

The region's largest industries are Other retail trade; Construction; Hospitals; and Wood product manufacturing.

In the next 10 years, the Cariboo region is expected to have 20,400 job openings. About 82 per cent of these jobs will replace retirees and only 18 per cent will come through economic growth. Employment demand is expected to grow at an average of 0.4 per cent annually during the next 10 years, the slowest among the regions.

## 6.6 | North Coast and Nechako

This coastal region stretches along the northwestern tip of the province and includes Haida Gwaii, the north coast of the province and the inland area of Nechako. The area is the second largest of B.C.'s seven economic regions. Key cities in the region are Prince Rupert, Terrace, Kitimat and Smithers. While the region is the most sparsely populated of the province, it is rich in pristine landscapes and natural resources. Also, Prince Rupert is the location of one of Canada's key ports which is projected to expand significantly over the next 10 years.

The region has the smallest, but one of the youngest, populations in the province. About 1.6 per cent of B.C.'s population and workers live here.

In 2020, the region had a participation rate of 64.6 per cent, slightly higher than the provincial average (63.6 in 2020).

Its unemployment rate of 8.8 per cent was on par with the provincial average (8.9 per cent).

The region's economy is based on natural resources. Its large employers are in the Mining; Oil and gas; Quarrying; Forestry; and Transportation industries.

Over the next 10 years, employment demand is expected to increase at an average of 1.4 per cent annually, on par with the provincial average. A total of 15,200 job openings are expected in the region over the 10-year forecast.

The largest industries by employment size are Construction; Other retail trade (excluding cars, online shopping and personal care); Elementary and secondary schools; and Primary metal manufacturing.

**TABLE 6.1-1: TOP 10 INDUSTRIES BY JOB OPENINGS, NORTH COAST AND NECHAKO, 2021-2031**

## 6.7 | Northeast

B.C.'s largest region in terms of land size is situated on the northeast top of the province. It borders Alberta to the east and the Northwest and Yukon Territories to the north. This region is sparsely populated and mainly rural, aside from the cities of Dawson Creek and Fort St. John.

About 1.3 per cent of B.C.'s population lives here, and 1.6 per cent of B.C. workers reside in the region. The population in the Northeast is younger than the B.C. average.

The Northeast had the highest participation rate in 2020 at 74.1 per cent, 10.5 percentage points higher than the provincial average (63.6 in 2020). It had an unemployment rate of 6.4 per cent, the lowest in the province, in 2020. The average B.C. unemployment rate was 8.9 per cent in 2020.

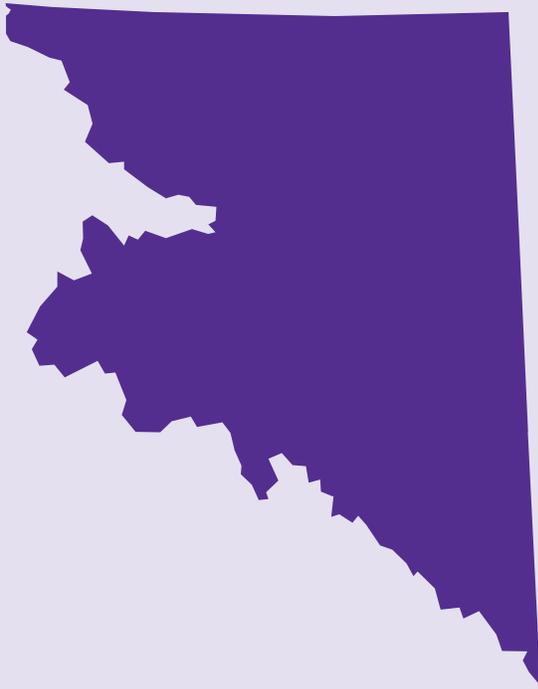

The region's major employers are: Other retail trade (excluding cars, online shopping and personal care); Construction; and Oil and gas extraction.

Employment demand in the region is forecasted to increase each year by 1.0 per cent on average until 2031, slower than the provincial growth of 1.4 per cent. Over the next 10 years, a total of 12,300 job openings are anticipated, of which 35 per cent will be generated by economic growth.

**TABLE 6.7-1: TOP 10 INDUSTRIES BY JOB OPENINGS, NORTHEAST, 2021-2031**

Industry	Employment 2021	Employment Growth Rate			Job Openings 2021-2031			Annual Replacement Rate

## 7.0 | Indigenous labour market information

As discussed in the 2019 report, labour market information related to Indigenous communities – First Nations, Inuit and Métis – is limited. Programs such as the national Labour Force Survey do not collect adequate, quality Indigenous community data. The Labour Force Survey itself does not cover on-reserve populations. The 2016 Census provides good basic data, but some Indigenous communities have low census participation rates. Furthermore, the labour market information that Statistics Canada releases was not designed, collected or delivered with enough participation from Indigenous communities. As a result, the data lack content on Indigenous people's experience of the labour market or their contribution to it. The 2021 Census data should improve on some of these limitations when the data are released in late 2022.

Many Indigenous communities value a wide range of activities that are often not captured by labour market methodologies. For example, some Indigenous communities spend substantial time harvesting, fishing and hunting for food during specific seasons throughout the year. Indigenous people also often undertake duties contributing to community, ceremonial and other cultural events. These activities are left out of most official labour market statistics.

The Ministry of Advanced Education and Skills Training is in the early stages of building partnerships with Indigenous communities and organizations to explore collaborative and Indigenous-led approaches to gathering labour market information that meets the needs of Indigenous communities. The intention of these partnerships is to provide a more relevant and inclusive picture of labour market experiences and outcomes.

Through this process, the B.C. government recognizes the need for Indigenous data sovereignty, in alignment with the *Truth and Reconciliation Commission Calls to Action* and the *United Nations Declaration on the Rights of Indigenous Peoples*. For example, data governance measures that align with the First Nations Information

**According to the 2016 Census, there were 271,000 Indigenous people of all ages living in B.C. Of these 201,000 were aged 15 years and older and of these 128,000 were in the labour force. This includes people living both on and off reserves.**

**The Indigenous working-age population is growing fast. According to the Labour Force Survey, the annual growth rate for the off-reserve Indigenous population 15 years old and older increased at an annual rate of 3.8 per cent from 2016 to 2020, well above the overall annual growth rate of 1.7 per cent over the same period.**

**Sources:** Statistics Canada. Census 2016; Statistics Canada. Labour Force Survey Table 14-10-0364-01.

Governance Centre's Ownership, Control, Access and Possession (OCAP®) principles will be a critical element of focus for the partners involved in supporting the development of improved labour market information on Indigenous communities.

The Sector Labour Market Partnerships program (SLMP) is one resource that is helping Indigenous communities and organizations develop labour market information, research labour opportunities and find solutions to barriers. This program helps sectors, regions and populations understand and respond to labour market changes. It develops collaborative partnerships for long-term, strategic, sustainable solutions to workforce challenges.

Recent projects include:

## 8.0 | Conclusion

The B.C. Labour Market Outlook: 2021 Edition provides an updated forecast that takes into account the impact of the COVID-19 pandemic and wide range of other economic, demographic and industry trends. Key growth industries are the tech and health care sectors.

Employment in B.C. is expected to reach 3.0 million by 2031, up from 2.6 million today. Employment will grow by 1.5 per cent a year during the first five years of the forecast and 1.1 per cent during the last five years.

Over one million total job openings (1,004,000) are expected between 2021 and 2031. Of these, 37 per cent are due to expansion job openings and 63 per cent are due to the need to replace retiring workers.

Top major industry groups are Health care and social assistance (142,900 job openings); Professional, scientific and technical services (140,700); Retail trade (103,700); Construction (75,900); and Accommodation and food services (65,000).

The Professional, scientific and technical services industry, a core part of B.C.'s tech sector, will grow at the fastest pace (2.6 per cent per year), driven by accelerated digitalization. The Health care and social assistance industry is expected to grow at 1.5 per cent per year, driven by the needs of an aging population.

Certain industries have strong growth over the first few years due to bounce-back from the pandemic, including Information, culture and recreation (1.9 per cent annually); Repair, personal and non-profit services (1.8 per cent annually); Business, building and other support services (1.7 per cent annually); and Accommodation and food services (1.6 per cent annually).

Almost 80 per cent of job openings will require some form of post-secondary education or training.

# Appendix 1: Definitions

## Labour Market Definitions

**Additional supply requirement:** The need for a supply of labour not met by young people starting work, international in-migration or migration within Canada.

**Immigrants:** Net in-migration from persons moving to British Columbia from outside of Canada.

**Job openings – expansion:** New job openings that arise due to economic growth during the forecast period.

**Job openings – replacement:** Job openings to fill positions that are generated by a permanent exit from the labour force during the forecast period. This includes exits due to retirements, illness, disabilities, deaths and other reasons.

**Job openings – total:** The total of expansion job openings and replacement job openings.

**Labour demand:** The number of employed people plus unfilled positions.

**Labour supply:** The labour force, including those who work and those who are actively looking for work.

**Migrants from other provinces or territories:** Net in-migration from provinces and territories in Canada outside of the province of British Columbia.

**Net in-migration:** Net of the inflow and outflow of persons to or from British Columbia. Persons could be moving from or to other provinces and territories or from or to outside of Canada.

**Young people starting work:** Persons, 17 to 29 years old, starting work for the first time after graduating from or leaving the education system.

## O\*Net Skills And Competencies Definitions

The United States' [O\\*NET](#) is a comprehensive database that contains information on occupational characteristics as well as worker characteristics and requirements for almost 1,000 occupations based on the Standard Occupational Classification (SOC). The O\*NET database is collected and updated through ongoing surveys of workers in each occupation, supplemented in some cases by occupation experts. The database describes occupations in terms of the skills, knowledge, education and abilities required, as well as how the work is performed in terms of tasks, work activities and other work characteristics. There is no comparable data available for Canada at this time and the data is considered sufficiently relevant to the B.C. labour market.

The O\*NET dataset identifies a total of 35 work-related skills:

➤ 10 basic skills (called skills in this report):

- Reading comprehension
- Active listening
- Writing
- Speaking
- Numeracy
- Science
- Critical thinking
- Active learning
- Learning strategies
- Monitoring

➤ 25 cross-functional skills (called competencies in this report):

- Social perceptiveness
- Coordination
- Persuasion
- Negotiation
- Instructing

- Service orientation
- Complex problem solving
- Judgment and decision making
- Systems analysis
- Systems evaluation
- Time management
- Management of financial resources
- Management of material resources
- Management of personnel resources
- Operations analysis
- Technology design
- Equipment selection
- Installation
- Programming
- Operations monitoring
- Operation and control
- Equipment maintenance
- Troubleshooting
- Repairing
- Quality control analysis

**Active learning:** Understanding how new information could be used to solve current and future problems in making decisions.

**Active listening:** Giving full attention to what other people are saying, taking time to understand the points being made, asking questions as appropriate and not interrupting at inappropriate times.

**Competencies:** Ability to perform specific tasks well and to adapt easily to the activities of a variety of jobs.

**Complex problem solving:** Being able to solve novel, ill-defined problems in complex, real-world settings.

**Co-ordination:** Organizing the different elements of a complex initiative or activity so as to enable items, tasks and people to work together effectively.

**Critical thinking:** Using logic and reasoning to identify the strengths and weaknesses of alternative solutions, conclusions or approaches to problems.

**Equipment maintenance:** Performing routine maintenance on equipment and determining when and what kind of maintenance is needed.

**Equipment selection:** Determining the kinds of tools and equipment needed to do a job.

**Installation:** Installing equipment, machines, wiring or programs to meet specifications.

**Instructing:** Teaching others how to do something.

**Judgment and decision making:** Considering the relative costs and benefits of potential actions to choose the most appropriate one.

**Learning strategies:** Choosing and using training, instructional methods and procedures appropriate for the situation when learning or teaching new things.

**Management of financial resources:** Determining how money will be spent to get the work done and accounting for these expenses.

**Management of material resources:** Ensuring the appropriate use of equipment, facilities and materials needed to do identified tasks and projects.

**Management of personnel resources:** Motivating, developing and directing people as they work, and identifying the best people and skills for the job.

**Monitoring:** Keeping track of and assessing the performance of oneself, other individuals or organizations to make improvements or take corrective action.

**Negotiation:** Bringing others together and trying to reconcile differences.

**Numeracy:** Using mathematics to solve problems.

**Operation and control:** Controlling operations of equipment or systems.

**Operations monitoring:** Watching gauges, dials or other indicators to make sure that a machine is working properly.

**Operations analysis:** Analyzing operational and product needs to create a design.

**Persuasion:** Convincing others to change their mind or behaviour.

**Programming:** Writing computer programs for various purposes.

**Quality control analysis:** Conducting tests and inspections of products, services or processes to evaluate quality or performance.

**Reading comprehension:** Understanding written sentences and paragraphs in work-related documents.

**Repairing:** Repairing machines or systems using the needed tools.

**Science:** Using scientific rules and methods to solve problems.

**Service orientation:** Actively looking for ways to help people.

**Skills:** Ability to perform tasks as a result of one's knowledge, learning or practice.

**Social perceptiveness:** Being aware of others' reactions and understanding why they react as they do.

**Speaking:** Talking to others to share information effectively.

**Systems analysis:** Determining how a system should work and how changes in conditions, operations and the environment will affect outcomes.

**Systems evaluation:** Identifying measures or indicators of system performance and the actions needed to improve or correct performance, while meeting the goals of the system.

**Technology design:** Creating or adapting equipment and technology to serve user needs.

**Time management:** Managing one's own time and the time of others.

**Troubleshooting:** Determining causes of operating errors and identifying solutions.

**Writing:** Communicating effectively through composing text as appropriate for the needs of the audience.

The O\*NET dataset is measured in two different scale types, a five-point importance scale and a seven-point level scale.

- Importance scale indicates the degree of importance a particular skill is to the occupation. The 2021 Labour Market Outlook analysis used the importance scale.
- Level scale indicates the degree to which a particular skill is required or needed to perform the occupation.

## Appendix 2: Methodology and Assumptions

The B.C. Labour Market Outlook forecasting model generates 10-year projections of labour demand and supply, covering 500 occupations and 61 industries for B.C. and its economic development regions. A full description of the [methodology](#) is available on the website of the Labour Market Information Council.

The forecasting system is composed of three sets of regional models: macroeconomic models, industry employment models and occupational models. The combined results of the regional models generate the provincial forecast.

### Macroeconomic models:

- Each of the seven regional macroeconomic models has two main sections: an economic and a demographic component.
- The economic component generates industry employment estimates and forecasts. It links to the labour demand projections in the occupational model.
- The demographic component links to the labour supply projections in the occupational model.
- Each regional macroeconomic model splits the entire regional economy into 15 high-level industries based on the 2012 North American Industry Classification System (NAICS) structure.

### Industry employment models:

- Each of the seven regional industry employment models converts employment for high-level industries from the macroeconomic model into employment estimates and forecasts for 61 industries.

### Occupational models:

- For labour demand, each of the seven regional occupational models produces labour demand projections for 500 occupations at the four-digit NOC level based on the provincial level estimates.
- For labour supply, the seven regional models are aggregated into four regions to produce labour supply forecasts for 500 occupations at the four-digit NOC level. The aggregated regions are Mainland/Southwest, Vancouver Island/Coast, Southeast (Thompson-Okanagan and Kootenay combined) and North (Cariboo, North Coast and Nechako, and Northeast combined).

Three simplified steps illustrate how the B.C. labour market forecasting model works:

- Expected economic and industry performance, as well as labour productivity, determine labour demand. Economic and industry growth as well as major projects drive labour demand in each region.
- Demographic shifts, economic performance and labour force participation drive labour supply and its components of change.
- Both supply of and demand for labour in each occupation determine labour market conditions for the occupation.

## Appendix 3: Job openings, employment, wages and education for 500 occupations

NOC	Occupation Title	Employment 2021	Job Openings 2021-2031	Wage Rate Low 2020	Wage Rate Median 2020	Wage Rate High 2020	Typical Education Background
0011	Legislators	1,010	500	\$30,748*	\$65,769*	\$144,465*	Degree

**Note:** Job openings and employment are rounded to the nearest ten.

#### Wage Data

The wage rate refers to the Job Bank hourly wage rate which was updated in 2020, unless otherwise noted. For occupations with a “\*”, the annual wage rate is provided as the hourly wage rate is not available. In some cases, no wage data is available and this is denoted by a “-”. The data source is Employment and Social Development Canada.

#### Typical Education Background Definition

**Degree:** Usually requiring a Bachelor’s, graduate or first professional degree

**Apprenticeship Certificate:** Usually requiring apprenticeship training

**Diploma/Certificate Excluding Apprenticeship:** Usually requiring diploma or certificate, excluding apprenticeship training

**High School:** Usually requiring high school and/or occupation-specific training

**Less than High School:** Usually requiring on-the-job training

## Appendix 4: Supply composition for 500 occupations

This table provides projections for supply additions for each occupation. Net additions to supply = Young people starting work+ Immigrants + Migrants from other provinces + Inter-occupational mobility + Additional supply requirements. The sum of Net additions to

supply + Decline in unemployment = Job openings. Note that the Additional supply requirements can be considered a supply shortage to be addressed through increased labour force participation and increased automation.
